TOTAL QUALITY. ASSURED.

INTERLINK
DATA MANAGEMENT PLATFORM

Our system solution to your challenges

intertek
interlink™
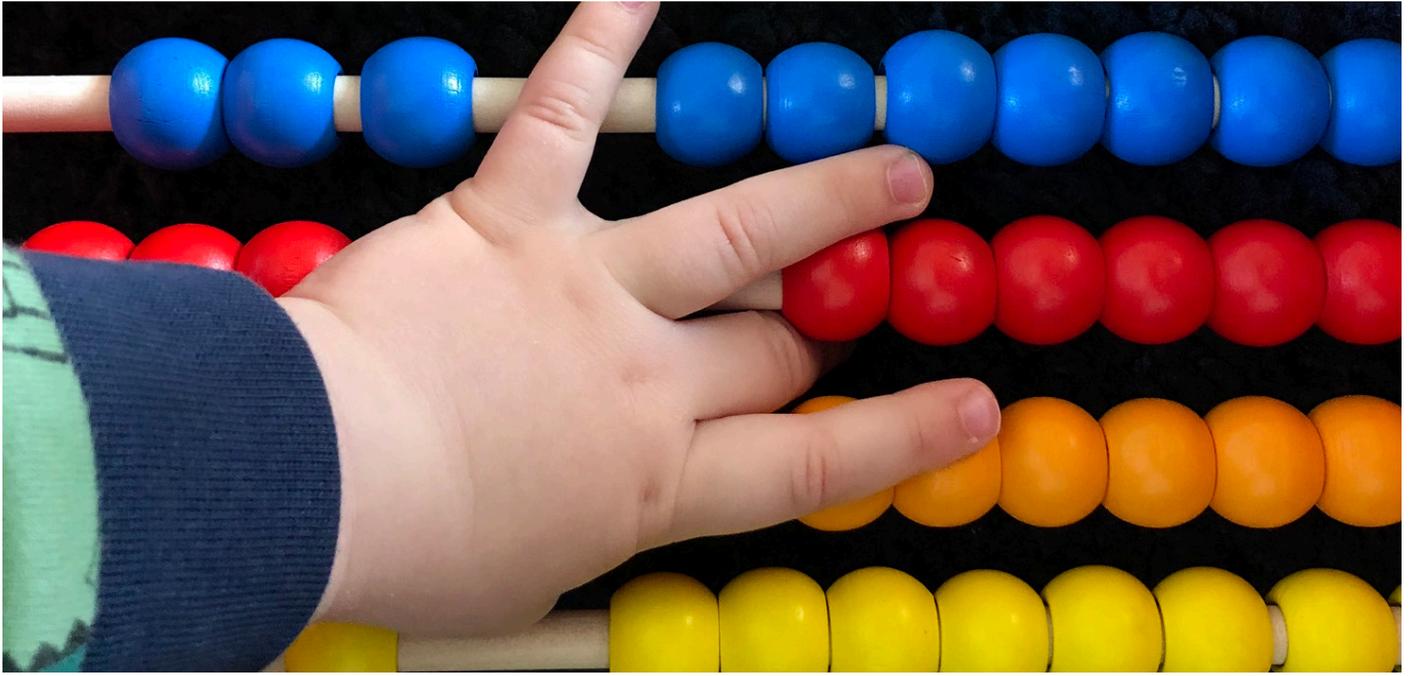

Total Quality Assurance Driven by Data

A system solution to solve your supplier, sourcing and product testing challenges.

InterLink™, a data management platform offered by Intertek, delivers Total Quality Assurance by providing centralized insight into your sourcing operations and supply chain's testing and inspection activities, to enhance visibility into complex production cycles.

InterLink is a unified online platform that enables consumer goods brands and retailers to:

- Optimize and streamline supply chains
- Minimize risk and make informed decisions
- Boost convenience and efficiency
- Facilitate team collaboration
- Improve speed to market

Our online platform enables users to submit testing and inspection requests, manage reporting and conduct performance analysis from anywhere, at any time, delivering convenience and enabling efficiency.

Data Security
Our InterLink platform has been constructed with data security in mind. It incorporates role-based access, with access rights definition for different roles in your supply chain.

Enhanched Experience
InterLink comes in as a standard tool with out-of-the-box reporting capabilities and quick on-boarding. Customization is also available for more complex supply chains that require additional functionalities. To cater your end-to-end needs, our platform can be integrated to your Product Lifecycle Management (PLM) systems.

NAVIGATING COMPLEXITY WITH
OUR DATA SOLUTIONS

Global retailers and brands rely on InterLink to simplify their complex supply chain through delivery of business intelligence to improve efficiencies and reduce risk.

Process Transparency

InterLink offers brands and retailers real-time access to track and monitor testing and inspection status, 24 hours a day, seven days a week. Related data and documents are housed in one centralized location, streamlining workflow.

Convenience & Efficiency

Using InterLink's online portal improves testing and inspection data integrity across different facilities and parties. Test reports and related documentation for a single product can be accessed with a single mouse click.

Collaboration & Communications

Our specially designed platform fosters collaboration and communication within a complex supply chain, which are critical to efficient sourcing and thus retailing.

Business Intelligence

InterLink's user-friendly dashboard provides users with a snapshot of product status and supplier performance at different dimensions. Users can easily perform a pass/fail analysis and analyze these failures by type or report volume to identify patterns for remediation.

Risk Management

The comprehensive, single-source platform enables brands and retailers to manage risk through reviewing marginal failures, monitoring supplier performance, leveraging analytics to identify areas for improvement.
